

Inverter Quick Installation Guide

This installation guide applies to AS1-3KS-5.1 AC Retrofit Battery System

1. Requirements for the mounting position

Figure 1.1: Permitted and prohibited mounting method

Figure 1.2: Minimum clearance

2. Mark the load-bearing point

Figure 2.1: AS1-3KS-5.1 wall mounting bracket dimensions (master device)

Figure 2.2: B1-5.1-4.8 wall mounting bracket dimensions (slave device)

Figure 2.3: Drilling position of the Load-bearing point (master device)

Figure 2.4: Drilling position of the Load-bearing point (slave device)

3. Mounting inverter

Figure 3.1: Position interval between master and slave

Figure 3.2: Install the wall mounting bracket

Figure 3.3: Install the AS1-3KS-5.1 on wall mounting bracket

4. Electrical Connection

Figure 4.1: Electrical interface description

| Code | Name |
|------|---------------------|
| A | DRMS Port |
| B | CT/Meter connection |
| C | RS232 communication |
| D | Grid connection |
| E | Backup connection |
| F | Ground |
| G | BMS switches |
| H | Battery switches |
| I | BAT+ |
| J | BMS LINK |
| K | BAT- |

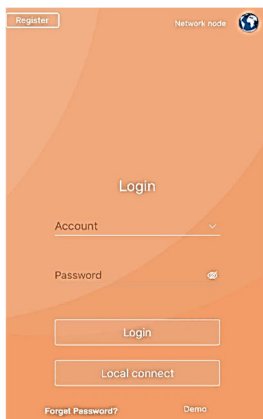

Figure 6.6: Connect the 7-8 terminals of RS485 to the 24-25 terminals of meter

7. Initial setup

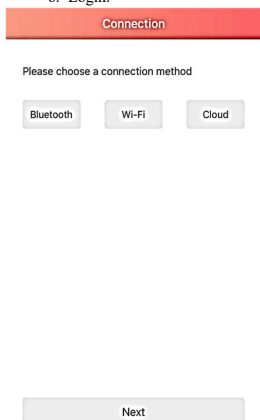

Step 1: Download eSolar O&M APP.

- For the iOS system, search “eSolar O&M” in App Store to download.
- For the Android system, search “eSolar O&M” in Google Play to download.

Step 2: Open the software.

- Enter your account and password.
- Login.

Step 5: Select connection methods.

- Choose one of the connection methods.

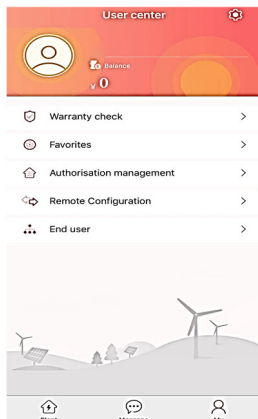

Step 3: Enter the user center.

- Tap the “MY” icon in the lower right corner of the main interface.

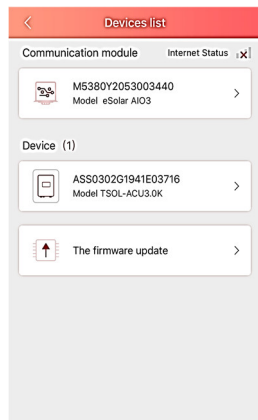

Step 6: Pair with the equipment

- Select the correct model of the module to connect.

Step 4: Connect the devices.

- Tap “Remote Configuration.”

Step 7: Equipment selection

- Tap “AS×××××” series device.

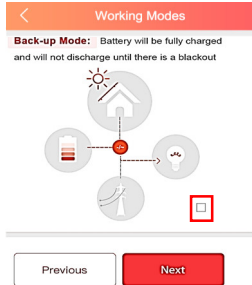

Next

Step 8: Initial setup

a. Set local grid compliance and time as per the local regulations.

**Step 9: Working modes selection**

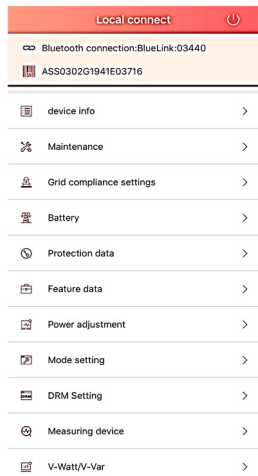

a. Tap the area marked by the black box to select the operational mode.

**Step 10: Measuring device**

a. Select one of the monitoring equipment to connect.

**Step 11: Device information**

a. View the device information on this interface and tap the icon marked with the black box in the upper right corner.

**Step 12: Complete the setup**

a. Complete the parameter setting and enter the device configuration interface.

END
